

When A Postmaster Really Looks Out For The Public, He's Worth While

POSTMASTER GENERAL Bureau.

WASHINGTON, D. C.

MY DEAR Sir,

THE LAST time I wrote you.

I ADDRESSED you as general.

AND YOU never answered.

SO I'm trying Sir.

WHICH I understand.

WAS ONE of your nicknames.

WHEN YOU were a boy.

AND IF you don't answer.

I DON'T care.

BECAUSE ANYWAY.

I GET a lot of letters.

AND WHY I'm writing.

IS JUST to tell you.

THAT IN a little town.

CALLED EAST Ashbury.

IN CALIFORNIA.

THERE is a postmaster.

WHO is foolish enough.

TO HAVE an idea.

THAT THE job he has.

IS A job.

AND NOT a vacation.

AND NOW I know it.

IS THAT yesterday.

I DROVE to town.

AND IT was raining.

"FAKE" ASPIRIN WAS TALCUM

Therefore Insist Upon Genuine "Bayer Tablets of Aspirin"

Millions of fraudulent Aspirin Tablets were sold by a Brooklyn manufacturer which later proved to be composed mainly of Talcum Powder. "Bayer Tablets of Aspirin" the true genuine, American made and American owned Tablets are marked with the safety "Star" Cross. Ask for and then insist upon "Bayer Tablets of Aspirin" and always buy them in the original Bayer package which contains proper directions and dosage. Aspirin is the trade mark of Bayer Manufacturing of Monocacetic Acid of Salicylic Acid.—A.D.

GREAT ACTIVITY IS APPARENT IN THE DUKE OIL FIELDS

DUBLIN, Tex., March 12.—(Special).

—Sixteen miles northwest of Dublin is the Duke oil field from which so much sensational news is now emanating. Dublin is at the junction of the M. & T. railroad and the Frisco railroad. The Duke field is located in the northeast part of Comanche county and about 20 miles across country and southeast of the Ranger field.

From wells recently brought in the adjoining counties of Stephens and Eastland, where oil pipe line transportation is available, the amount of oil marketed is now 40,000 barrels a day. As a matter of comparison the famous Goose Creek gusher field in southern Texas, which has made so many millionaires during the last few years, has a production of only 15,000 barrels a day.

The first well brought in in the Duke field was by the Magnolia Oil company, absolutely upon a wild cat drilling. It is known as the Magnolia Duke No. 1 and is producing 3,000 barrels per day.

Prominent among the companies with extensive holdings in the Duke field is the Duke of Dublin Oil company, which takes its name from the fact that prominent land owners and substantial business men at Dublin have secured three choice tracts of land and combined them in the company at the small capitalization of \$100,000 for actual production of oil as a business. These properties are located near the Knowles gusher and other famous Duke wells. The company is composed of practical and experienced oil men and successful business men which is assurance to the investors an able and efficient management with reputations of being associated only with square deal enterprises.

The Duke of Dublin officials state that most of the 100,000 shares of the stock has already been placed; in fact, there remains less than 40,000 shares. For the present a small number of these will be sold investors desiring to join in this enterprise at \$1 a share.—From Arizona Gazette March 12, 1918.

We're After OIL

Say, if we get one well such as the first in this famous GUSHER field it'll take less than three weeks to pay every investor a hundred per cent dividend. Consider a few facts now. There hasn't been a dry hole in the whole section—every well is a big producer—a GUSHER, mind you. And we have room for twenty of them on our THREE tracts. There's positively no reason why we shouldn't get just as big production as our neighbors. At any rate that's the way the BIG oil men figure, who are offering us many times the capitalization of our company for our holdings.

BUT WE WANT TO GET THE OIL OURSELVES. We've hit it lucky. Our holdings are closer to the big producers than any other company offering stock for sale. Perhaps you didn't know that our Tract No. 1, consisting of 81-3 acres in the west end of the Higgins tract in the Fry survey, is jam up against such famous wells as the Duke and Knowles, and that the men down there in the field are confident that it is only a question of how long it will take to sink a drill until we bring in another GUSHER.

There's another thing we want to call your attention to again. Our stockholders are EQUAL partners with the organizers—they get in on the same basis. There's no BIG PROMOTION fee goes. It's simply a proposition of getting money with which to drill—we've already secured the BEST leases possible.

If you feel like you want to make a few thousand in oil you will never have a better proposition offered you than the Duke of Dublin. The only requirements here are that you get in quick because this stock is going FAST. We're on the home stretch—less than 30,000 shares left and the moment they're gone the drills start down. And how would you like to have a check for your ENTIRE investment back after the well has been flowing THIRTY DAYS? Well, you'll never get a dividend check unless you invest. There's no money in wishing you'd bought.

Duke of Dublin Oil Company,
Sheldon Hotel,
El Paso, Texas.

Gentlemen:
Please enter my subscription for _____ shares of the fully paid and non-assessable stock in the Duke of Dublin Oil Company at \$1.00 per share. Enclose find remittance to cover same in full.

Signed _____

DO YOU REMEMBER?

DO YOU REMEMBER? You had just left college in those days—you had a pretty hard time getting something to do. You had made up your mind that you wanted to get in the selling end of some business—you didn't want a clerical job. It was the first clerical position that came their way. It seemed such a real gentlemanly way of getting a job. They didn't have to solicit anything from anyone. They could keep their clothes clean, too, in that sort of work. That sort of position didn't satisfy you. However, you found it almost impossible to get a chance at what you really wanted. You went to see every shoe factory and wholesale dry goods house in town, but when you told them that you had no experience or definite knowledge of either the shoe or clothing business, there was nothing doing. Several of them advised you that they would start you out in the stock room at five dollars a week and then at the end of several years—if you showed some aptitude—they might give you a chance. You felt then that they were overlooking you. You knew full well that if they would give you a couple of weeks to look over the catalogues you could sell them out of stock in short order, but for some reason they didn't seem to look at it. It was that way for several days. It was up to you to make an opening somewhere.

Don't you remember when you answered the ad of the big publishing house? That was some brave chap who received you that morning. He seemed so interested in you—was so sure that you would make a success of selling books. He didn't tell you that out of about 50 who he would start out with a prospectus and send contracts only about five would stick at the job more than a week and only about one would stay with the same man and sell them out. You had a good approach and when you did get an audience, it was generally found easier to make a sale than you thought to get rid of you in any other way.

You could soon afford to get some real tailored clothes and it wasn't long before that most critical functionary, the office boy, would take you for the president of a shoe factory or something—and you would get in to the office of the big boss before you knew it.

Don't you remember when you decided to take the big middle western territory for the new series of volumes entitled "Biographies of America's Foremost Men." You figured that this would prove the best proposition that you had ever tackled. When it came to pure psychology this new scheme was the real thing. By this time you had met some real people. Of course these practical, busy, successful men were hard to lead on ordinary schemes. You might have found it pretty hard to sell them a copper mine or stock in an oil company but you had the biographical sketch pretty well figured out. When some of these brass collars told you that they didn't care for this sort of stuff, you came back with this line of dope: "Of course, YOU don't, but don't you want your children to realize what their father has accomplished? Wouldn't it be a wonderful incentive to them to know that their father had taken a definite part in the building up of the business fabric of this great country?"

Of course they "fell" then—plumb down the elevator shaft. You saw they had to think of their children and their children's children and you headed straight off the big nose for a couple of thousand each, in return for which they would have inserted their interesting biographies and a good steel engraving for their descendants to be proud of in future years.

You found several large cities in this great land and a good many "captains of industry" in each one. After awhile you got no expert in this work that most of these "captains" felt that you had done them a favor to have thought of them. They were pleasant people, weren't they?

Then, don't you remember when you were in position to retire from active business? You bought a swell home out on the boulevard, you had your car. Sometimes you would pass some of your old clerical friends on the way to the street car. Most of them were still clerking, and had to hark back to the alarm clock at home—and the time clock at the office. You were glad that you had tackled early in the game the sales end of the business—for, to the fellow who sells and delivers the goods, isn't it A PRETTY GOOD WORLD AFTER ALL?

—Cliffhorne Adams.

14 Years Ago Today

From The Herald of This Date, 1903.

REPORTS from Tokio say that the country is swarming with hungry, disheartened Russians, who are surrendering to any pursuing Japanese they meet. Gen. Kuropatkin must remove his quarters from the Pass if he plans a retirement to Harbin.

Five that broke out today in the printing and box department of the Grand Crossing Truck company's plant at 15th and Chestnut, Chicago, caused the loss of \$50,000. Although there was a panic among the workers all were taken out in safety.

A score of people were burned to death and 50 others injured in a fire that destroyed a five-story tenement house on Allen street, New York city. The fire started with the explosion of a lantern in the basement.

St. Ignace's church, which is being built at the corner of Second and park streets, is rapidly nearing completion, and will probably be dedicated May 1.

Five delegates were appointed by the board of directors of the Y. M. C. A. to attend the 15th annual state convention of the Y. M. C. A. to be held at Hillsboro, Tex. Those appointed are: M. M. Bray, the president; C. C. Tamm, the general secretary; H. T. Edgar, J. H. Nations, R. E. Nott.

Due to the heavy rains north and east of the city, the Rio Grande is steadily rising. A heavier flood is expected in a few days, since the rains still remain heavy.

The Elks are making preparations for a trip to Europe. The trip will be through Kansas City and by way of Chicago, Detroit and Niagara Falls. Edward Scott is secretary and Fred J. Goldman is in charge of arrangements for the trip.

The Victory Garden JUST LIKE FINDING GOLD.

Nice golden carrots are the richest looking root crop from the garden and they are fine for eating too, says today's bulletin from the National War Garden commission of Washington. In order to grow long and straight roots, the ground must be mellow 3 or 4 inches deep because when they strike a hard spot in the ground they branch off or twist around and become discouraged.

Write to the commission for a free booklet and you will be advised and good steel engraving for their descendants to be proud of in future years.

The carrot is an early crop and easily grown after it gets started. But carrot seed are small and the young plants are weak, so the seeds should not be planted deeply, a half-inch being enough. It is necessary to keep a dirt crust over the seeds after they are planted, so it becomes desirable to mix a few radish seeds in with the carrot seeds. The radishes grow quickly, and not only mark the rows so that you can go over them with a garden fork and break the crust and letting the tender carrot plants come up.

Half an ounce of seed will plant 50 feet of row which is enough for most families. If the plants come up rather thickly and crowd each other thin out to 6 or 8 to each foot of row. The rows may be as near together as 12 inches on rich soil. Begin using the carrots when they are half an inch across at the top, they are then tender and have the best flavor. Carrots are often and keep the plants growing rapidly. Can the surplus of the spring crop while they are small.

If You're Interested in OIL You're Interested in "OCEAN"

Only those who are not interested in OIL at all can afford to not be interested in "OCEAN." Only those who feel no desire to participate in the great oil development that is now taking place can afford to not consider "OCEAN" as the means of making a share of the wealth that nature is distributing so lavishly.

Consider the facts. The property of the OCEAN OIL & REFINING CO. is in the very choicest part of the Great RANGER field. Near to the greatest of the many producing wells.

With its drilling contract MADE—(it provides for the beginning of operations by the 25th of this month)—with its own rig to work with, and a man of long and successful oil experience to personally supervise that work the prospects could not possibly be better.

And when, added to this, you realize the fact that the men whom you KNOW—or men whom you can easily look up—if by chance you do not know them—you must reach the conclusions that "OCEAN" is WORTHY.

OCEAN is selling now, with astounding rapidity, at \$1.00 a share. As drilling progresses the price will be advanced to \$2.00. It's much better to buy NOW than THEN.

INVESTIGATE

Look carefully at that jar and carton of Resinol Ointment. Remember what it looks like when you ask for it at your drugist's. Insist upon getting the real Resinol—not something claimed to be just as good. If your treatment have proved a waste of time and money, Resinol seldom, if ever, fails to give entire satisfaction when treating eczema, nettle rash, ringworm, itch, pimples, dandruff, chafings, burns, and other eruptions and abrasions of the skin.

Rid the Face of Beauty Spoilers

Let Stuart's Calcium Wafers Be Your Beauty Treatment To Relieve the Face of Pimples, Blackheads, Etc.

Send for a Free Trial Package. For those pesky pimples and blackheads that ruin the complexion, be sure to use Stuart's Calcium Wafers. The influence of their calcium trains the skin into healthy condition and into a harmless substance for easy elimination instead of unsightly little red spots. Do not varnish your skin with cosmetics. It is a vain hope. Beauty is impaired by a bad, pimply skin and calcium is considered of great value for the treatment of the skin. Try these wafers. Thousands have done so with the most gratifying results. Stuart's Calcium Wafers are so widely known and used that you will find them on sale in almost any drug store in the United States or Canada. It is a safe bet if you wish to try them first, send your name and address to F. A. Stuart Co., 841 Stuart Bldg., Marshall, Mich., and a free trial package and a booklet will be sent you by return mail.—Adv.

TELLS DYSPEPTICS WHAT TO EAT
Avoid Indigestion, Sour Acid Stomach, Heartburn, Gas on Stomach, Etc.

Indigestion and practically all forms of stomach trouble, say medical authorities, are due to the presence of too much of an excess of hydrochloric acid in the stomach. Chronic "acid stomach" may be relieved by the use of a few tablets of Stuart's Calcium Wafers. These should be taken either one or two times a day.

Either they can go on a limited and often disagreeable diet, avoiding foods that disagree with them, that irritate the stomach and lead to acid secretion or they can eat as they please in reason and make it a practice to counteract the excess of acid by the use of a little Stuart's Calcium Wafers at the meal.

There is probably no better, safer or more reliable stomach antacid than Stuart's Calcium Wafers. It is used for this purpose. It has no direct action on the stomach and is not a digestant. But a teaspoonful of the powder or a couple of tablets taken in a little water with the food will neutralize the excess acidity which may be present and prevent its further formation. This removes the whole cause of the trouble and the mental distress naturally and healthfully without need of painful pills or artificial digestants.

Get a few courses of Stuart's Calcium Wafers from any reliable drugist. Ask for either powder or tablets. It never comes as a candy, milk or citrus acid in the disguised form is not a laxative. Try this plan and eat what you want at all your meals and see if this isn't the best advice you ever had on "WHAT TO EAT"—Adv.

CUT THIS OUT
OLD ENGLISH RECIPE FOR CATARRH OF THE BLADDER AND HEAD NOISES.

If you know of some one who is troubled with Catarrh of the Bladder, head noises or ordinary catarrh cut out this formula and hand it to them and you may have been the means of saving some poor sufferer perhaps from total deafness. In England scientists for a long time past have recognized that catarrh is a constitutional disease and necessarily requires constitutional treatment.

Sprays, inhalers and nose douches are liable to irritate the delicate air passages and force the disease into the middle ear which frequently means total deafness, or else the disease may be driven down the air passages towards the lungs which is equally as dangerous. The following formula which is used extensively in the East for the cure of a constitutional treatment and should prove especially efficacious to sufferers here who live under more favorable climate.

Secure from your drugist 1 ounce of Parment (Double strength). Take this home and add to it a pint of hot water and a little granulated sugar; stir until dissolved. Take one tablespoonful four times a day. This will often bring quick relief from distressing head noises. Clogged nostrils should be opened by blowing the nose and hearing improve as the inflammation in the eustachian tubes is reduced. Parment used in this way acts directly upon the blood and mucous surfaces of the system and has a tonic action that helps in obtaining the desired results.

It is easy to make, costs little and is pleasant to take. Every person who has catarrh or head noises or a hard of hearing should give this treatment a trial.—Adv.

LAMARINE WAFERS
FOR BILIOUSNESS—HEADACHE

The medicine with a conscience. Its purpose is to give perfect results without the usual nausea from the use of strong medicines. Nice to take—eat them like candy.

For sale by all druggists—50c per Box.—Adv.
